## EXPERIENCE

---

### UI DEVELOPER • ACCENTURE • 2019 – 2021 (PRESENT)

Working with H&M client for last two years. Ensured smooth functioning of HM portfolio brands by handling re-usable components based on atomic web-design model. Using latest technologies like ReactJS, ContextAPI, Material-UI, ES6 & SASS

### FULL STACK INTERN • ZANSYS TECHNOLOGIES • MAY 2018 – JULY 2018

Worked with US based client to build a job portal from scratch. Technologies used for frontend - Bootstrap, CSS3, Ajax. Technologies used for backend – PHP, MySQL

## PROJECTS

---

### COVID-VACCINATION SLOT FINDER

A portal to allow users to find vaccination slots for a given date near their location. Fully mobile responsive portal build on ReactJS, using Cowin portals official API to fetch data.

### GAME OF THRONES PORTAL

React JS portal based on a popular TV show, Game of thrones, showcasing all the main characters along with their in-depth details. The portal also allows user to play a quiz and filter characters by their name. Multiple Rest APIs to fetch and display in a mobile responsive interface.

### EXPENSE CALCULATOR AND VISUALISER

Build using latest concepts such as Hooks, ContextAPI & ES6, this project allows the user to add monthly income and expenditure to the portal. Based on the user input, the portal allows the user to visualize the data in form of charts using third-party libraries such as Chart.js
